HISTORY OF THIS NETWORK

This tourist development network, created in 1998, aims to share skills and strengths, promoting tourist aimed offers and improving the image of spa towns which have particular features (well-being activities with thermal water and thermal heritage): packaging tourist products, participating in European Days Heritage, communicating on heritage events, creating exhibition…

www.villesdeaux.com is the website of this association. You’ll find here all information about specific tourist activities and a large choice of journeys in the 17 spa towns of the network.
THE DIFFERENT KINDS OF WELL-BEING ACTIVITIES IN SPA TOWNS

All spa towns propose well-being activities, which are sold per unit, into one-day or several-days packages and even into complete journeys with accommodation.

HYDROTHERAPY : THE TRADITIONAL WELL-BEING TREATMENT

As the spring water is the key federating element of the water cities network, the major kind of well-being activities proposed in thermal baths are hydrotherapy treatments like bubble baths, jet showers... We find hydrotherapy well-being treatments in all spa towns in the Massif Central, proposed by either thermal baths, when there's no well-being centre in the town, or new equipment recently built. To complete their well-being offers, some thermal baths have invested to propose collective equipments as Turkish Baths (hammams), whirlpool... too.

SPA AND WELL-BEING INSTITUTES

For 15 years, some spa towns like Vichy with the VICHY THERMAL SPA LES CELESTINS (in 1993), Châtel-Guyon with the INSTITUT BIEN-ETRE (1995), Neyrac-les-Bains with the NATURAL SPA*** (in 2007) have even made the choice to build centres entirely dedicated to the well-being and so to separate their health-care treatments customers from the tourists.

THE NEW TRENDS

Today we can observe two main trends:

The appearance of “recreational spa” (in French : “centres thermoludiques”) as ROYATONIC, which opened in November 2007 in Royat (www.royatonic.com) and CALEDEN, which opened in May 2009 in Chaudes-Aigues (www.caleden.com). These big centers, which includes well-being institutes for dry aesthetician cares too, propose indoor and outdoor pools of spring water equipped with swan neck taps, hydromassing jets, whirlpools,... but also other equipments like Turkish baths, saunas, different temperature baths... The entry payment allows you the free access of all equipments during 2 or 3 hours (2 and half hours in Royatonic for example).

The appearance of beauty institutes into thermal baths, even in the little spa towns, opened to all people (customers of thermal baths or not). Five years ago, thermal baths of Bourbon-l’Archambault created so a DECLEOR beauty institute with one aesthetician and thermal baths of Neris-les-Bains opened in April 2008 a well-being space dedicated to aesthetic treatments and other cares...

Bourbon-Lancy
(Bourgogne Region, Saône-et-Loire County)

In Southern Burgundy, on the banks of the Saône-et-Loire, the Nièvre and the Allier rivers, the small city of Bourbon-Lancy invites you to an historical universe mixing pleasantly both styles and eras. From the medieval quarter to the 18th century castle, all here is a pretext to travelling through time... unless you prefer a moment of relaxation in Celtô, the well-being centre.

THE CELTÔ CENTRE: In Bourbon-Lancy, fitness-related services are provided in the Celtô well-being centre, independently from the thermal Baths.
Celtô is composed of 3 areas:
- **The Vitalys area**, dedicated to water in all its forms (pool, hammam, jacuzzi...)
- **The Aqualia area** (fitness via thermal water: baths, showers...)
- **The Nymphaea area** (esthetic cares: face and body cares, modelling...). Various musics and scents are associated to each area, to enhance the place given to senses. The centre also includes a bio infusion shop.

It has kept from this era the remnants of a fortress but most importantly, the atmosphere associated with the places that have known the greatest moments of French history. Here, we walk in the footsteps of Madame of Montespan and of the Prince of Talleyrand. To know that the fitness-related services are provided within the thermal establishment, built in the 19th century, and listed as Historical Monument.

**THERMAL BATHS:** Fitness-related services are provided in the prestigious environment of the Bourbon-l’Archambault thermal baths, listed as Historical Monument, with carved wooden coffered ceilings and bright coloured ceramic panels. There is really an exceptional place.
